Best Tinted Moisturizers w SPF, Spring 2011 Edition

It's that time of year again when I'm bombarded with tinted moisturizers to review. Over the past few weeks I've been in Tinted Moisturizer heaven, sporting a new one every few days. I've narrowed this batch down to 5 that I really like which also contain an SPF so you can catch some spring sun safely.

Skin 2 Skin Care Tint Anti-Photoaging SPF 30

Tint Anti-Photoaging SPF 30 can be worn as a foundation, but I like using the Tan shade as a moisturizer mix-in to get a pretty bronzy look and some SPF at the same time. More pigment dense than you'd expect, this formula is also a natural one that uses minerals to block out the sun.

Having SPF in your foundation is an easy way to protect your skin without adding another step. Find a formula you love and stick with it year round, your skin will look younger.
