Mommy Must Haves: 5 Favorite Tinted Moisturizers/Foundations for Summer

 Romy Schorr on Mon May 24 2010, 2:00pm UTC | [0 comments](#)

I'm in the best mood because summer is coming. Love the warm weather, love wearing sun dresses and love the feel of heat on my skin. But unless you live under a rock, you know how bad the sun is for your skin and how essential it is to protect yourself from these damaging rays. Typically, this is the time of year when I get even more serious about my sun protection and lately I have been trying out many tinted moisturizers and foundations with SPF 15+ in hopes of finding something really great. I am really excited about the variety of products available in this category, the advances in formulations, the pretty level of coverage and especially impressed by how light many of them are while at the same time providing a nice level of sun protection. Here are the ones that have impressed me so far:

1. **Skin 2 Skin Organic Anti-Photoaging SPF 30**

I adore the Skin 2 Skin line because the products are beautifully made, natural and organic, and it's a wonderfully active anti-aging skincare line. The Anti-Photoaging SPF product is just as impressive as the other products in the line. It contains Titanium Dioxide and Zinc Oxide (two of the most effective natural sunscreens) which protect from both UVA and UVB rays; it has a lovely slight tint to help balance out your skin tone; it has Shea Butter, Coconut and Jojoba Oils to protect and moisturize the skin; and it also has an added glide factor that helps evenly distribute the product on the skin without caking or dryness. I love the fresh herbal smell, the sheer coverage that subtly camouflages my redness and freckles, the high SPF of 30, and the instant even absorption of this product
