**Skin 2 Skin Care** will donate 10 percent of proceeds from their **Organic Anti-Photoaging SPF 30** to the **World Skin Project** – a non-profit that educates the public on how to detect, prevent and find treatment for skin cancer. The tinted moisturizers contain physical zinc and titanium oxide blocks that provide the strongest and most resilient protection on the market today. Shea butter, coconut and jojoba oils are added to hydrate and protect skin.
