

# Multi-tasking with Skin 2 Skin Anti-Photoaging SPF 30 Cream

Posted on the 13 July 2011 by [Beautyinfozone](#)

**True confessions time: I am not the best at remembering to put on sunscreen. And we all know that the best way to avoid getting wrinkles is to avoid the sun. So I love multi-tasking products, like this tinted moisturizer with sunscreen from Skin 2 Skin Care.**

**It's called Anti-Photoaging SPF 30 Cream (\$44), and it comes in three shades: Light Tint, Tan Tint, and Neutral Dark Tint. I tried the Tan Tint, and it was perfect for my faux-tanned skin (I am probably about a MAC NW30 or NW35 right now). It has UVA and UVB blockers in it (Zinc Oxide and Titanium Dioxide) for sun protection,**
